PHOTOGRAPHY

Perfecting the commercial photography comes our team dedicated to providing amazing photography capturing the real ambiance of the scene. We specialize in Historical, Cultural, Tourism, and Businesses with our ultra fast and lightweight camera we can complete the job in record time without disturbing the flow of the area. We can complete multiple areas quickly and efficiently to provide a competitive rate.

VIDEOGRAPHY

Every aspect of our videos proclaim Unity. We create an entire story from start to finish and make it flow. Professional and ready for web; we have a team to build it to your every dream. Sell your house online with a video walk through complete with photos of your house to entrance your customer in, Connect with the people with our team to internationally publish your museum, or work with us to create a documentary depicting modern day events.

360 PHOTOGRAPHY

Experience a tour like no other right at the touch of your finger tips. Swipe left and right and up and down and see what you would see if you were there at that very moment.

ANIMATION

We can derive a 3d rendering of the area from the current photos and reconstruct what it appeared as in the past. Visit sites that have been crumbled for years and experience the sights of what life looked like in the past. See the cultural aspects and glorious architecture brought back by our animators.

OBJECTIVE VR

Perfect for museums and businesses. We will make a collection of 360 interactive panoramas that can show off museum pieces or items in your catalogue from every angle giving your customer the ability to research and really see every aspect of the piece.

Looking around a panorama photograph sends the viewer to actually explore and want to see more about the area. It's interactive and gives the user the ability to see what was happening at the very second the photo was taken. Taking this one step further and created the ability to actually feel like you are there. We put together a high definition video in 360 connecting you even further to the culture and area. Where by using your mouse you can look into the sky as birds fly over or children play in the streets. Explore the culture around you and looking around in real time as if you were there.

360 VIDEO

Our team can create custom Web design for your business. With extensive knowledge we can create another part of your brand. We do all the SEO for you to improve your rating in Google. Let us create a streamlines system for you to interact with your guests with the option of having us help you run it, or pass it on to your tech support team. A professional website will enable you to gain credibility, keep your customers informed, hit a larger global market, all while saving time and money and increasing customer service.

WEBSITE DEVELOPMENT

The collage features several website mockups:

- Gourmet:** A website for gourmet food featuring a large image of a salad, a navigation bar with 'Home', 'About Us', 'Blog', and 'Gallery', and promotional banners for 'Birthday Party Cake Buffets' and 'Popular Coffee Menu'.
- Restaurant:** A website for a restaurant with a dark theme, featuring a navigation bar with 'Home', 'About', 'Events', 'Menu', 'Blog', and 'Contacts'. It includes a central image gallery of food and interior, and sections for 'Welcome!', 'Our History', and 'Our Events'.
- Fishing:** A website for fishing gear or services, featuring a navigation bar with 'Testimonials', 'Staff', and 'Contacts', a large image of a fishing boat on a lake, and a 'New line' section.

Push notifications allows you to easily remind customers about your products and services and unlocking features allows you to gain income through the app. This can help improve brand recognition, perceived value, customer engagement, and create customer loyalty while standing out from the competition.

Every day you interact with a business that has a mobile app. The big box stores like Wal-mart have an app on iTunes and Goggle play but more and more small businesses are understanding the effective mobile market they can attain. You make yourself visible to the customer at all times even in

areas where a wifi connection isn't available. With every smart phone user browsing their phone for an average of 2 hours a day or more. You can create a direct marketing channel to the customer providing general information, pricing, bookings, search features, user accounts, messengers, news feed, and more.

APP DEVELOPMENT

VIRTUAL TOURS

We take this collection of video and photos and integrate it right into a program. Inside the tour you can see different markers bringing you to a new panorama at that area. As you take the tour; information about what you see can be accessed giving the user an interactive learning experience. We can make this multilingual with both subtitles, and voice over. We incorporate animation or video that can be played in certain areas of the virtual tour giving a more in depth perspective of that location. If you already have videos of the area that you want to use we can easily incorporate your own videos into the program as well.

THE DESERT OF ONE THOUSAND AND ONE NIGHTS

With its seemingly endless expanses steeped in silence, the desert has a unique appeal. The landscape is rich and varied, ranging from classic high sand dunes to rocky surfaces with stones in countless different shades. Whatever form it takes, it is always spellbinding and offers unparalleled experiences for anyone who loves adventure and getting back to nature.

Seventy per cent of Oman is desert and there are many ways to explore it. Accommodation options range from complete comfort and luxury to more low-key options for adventure lovers and the budget-conscious. It also offers a great experience for families: imagine camel riding during the day and camping under the stars at night.

A journey into the desert allows visitors to witness the daily lives of the exceptionally hospitable Bedouins who still live on its outskirts.

Sharqiya Sands

The vast Sharqiya desert – also known as the Wahiba Sands, since this is the name of the local tribe – lies at the heart of Oman. Throughout the day, its dunes change colour from white to yellow to red.

Just a two-and-a-half-hour drive from Muscat or Sur, it is the most easily accessible desert

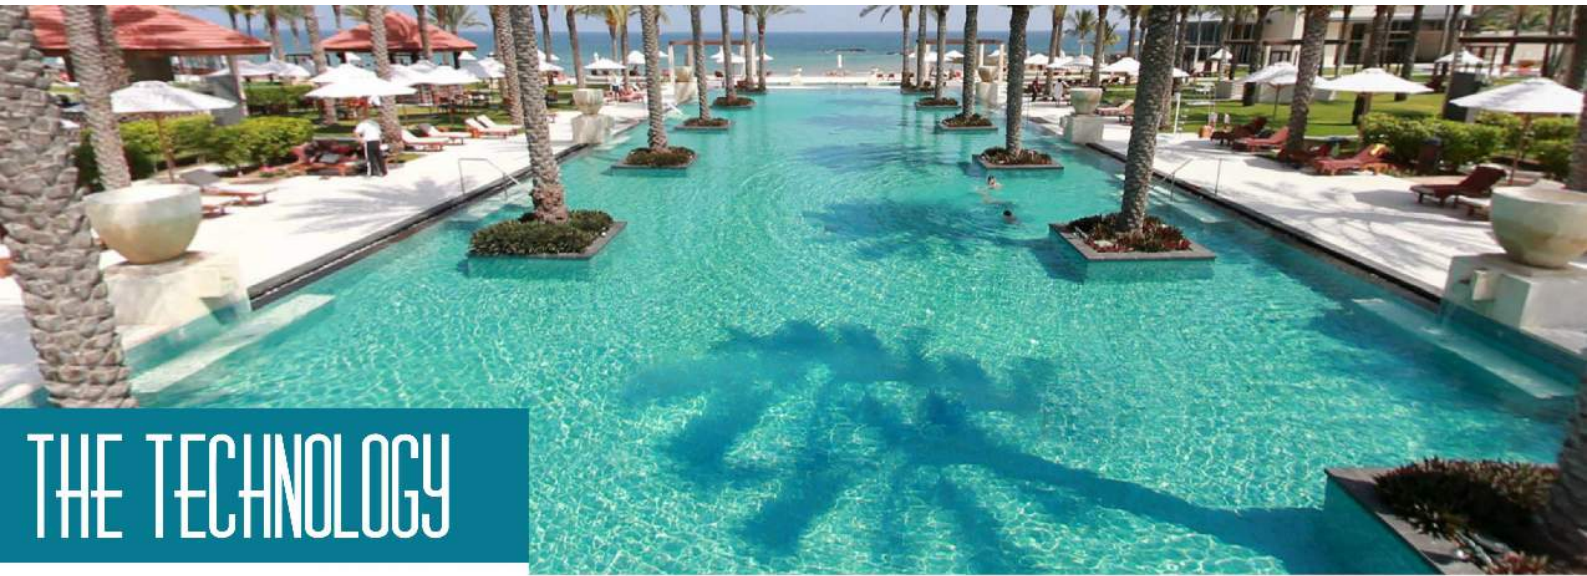

Ways to use Virtual Tours:

-Website Integration: Can be coded inside to provide an on-line tour to a global market

-App Integration: Available for download you can provide a mobile user access both on and offline.

-Flash drives: The program is uploaded and encrypted (cannot be copied) onto a flash drive. It will run on both Windows & Mac and gives the user offline access anywhere. The flash drives themselves can be customized for each business. We can create them in the shape of the country or design you a sleek engraved usb drive. Many options are able to be created just talk with one of our designers. These are perfect as marketing, publishing, and souvenirs to sell.

THE TECHNOLOGY

Developed first by the video game industry, they would take individual photos and digitally combine dozens of photos until it made a sphere. They would then render it inside the game to create a more realistic play experience. It was a pain staking process and was a long process to shoot one location properly.

With the increased rise in technology we have the ability to reduce the cost and time it takes to shoot an exquisite image. We have invented a small system of connected cameras to allow us to shoot an entire 360 degree sphere around the unit remotely. We have designed it to be lightweight and fit within the same space as a Dslr camera on a tripod. We set up in an area and blend into the background with the crowd and remotely take the photo. We can be set up in an area and have the photos needed within 15 minutes. This allows us to move to multiple locations at a quick place.

We have a variety of options available in our arsenal to give you the ability to have any area photographed.

Our UAV's (or unmanned Aerial vehicles) are small and lightweight produce stunning photos and video that we use

to stitch together to give you a complete view to show your customers. We have trained staff that follow NAV Canada guidelines and have special flight certificates for flying in a variety of area's and conditions.

In areas where powered vehicles are banned we have created the ability to do the same thing with balloons and kites. We have an option for any circumstance

For areas where the smaller vehicles would be overpowered by natural winds and inaccessible areas we have trained photographers who have worked doing aerial photography out of helicopters and planes.

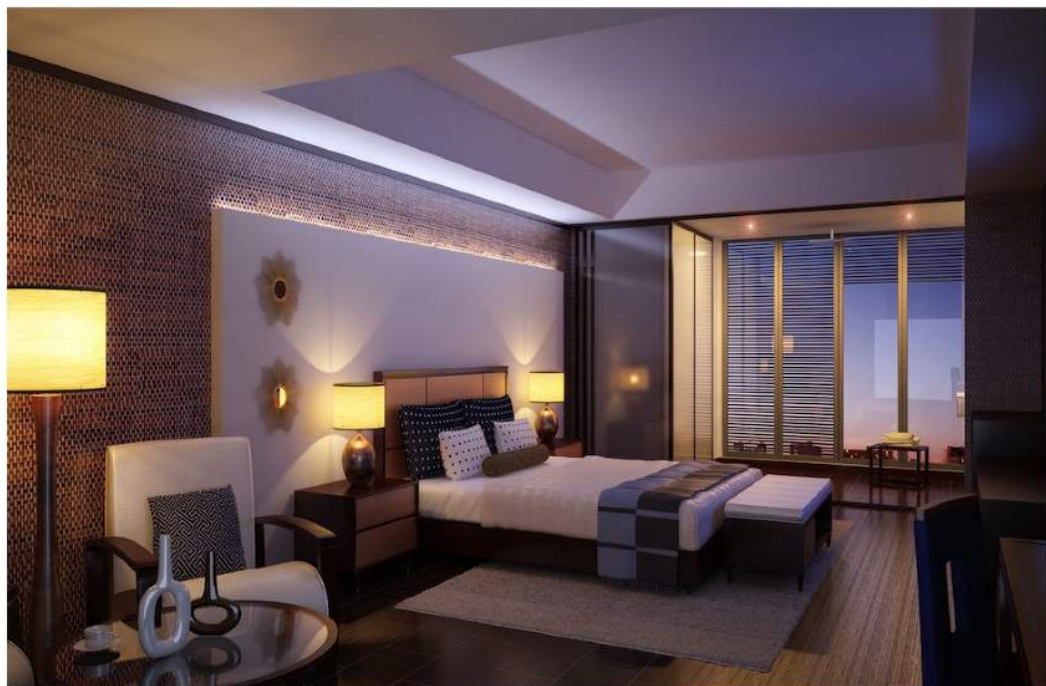

with less impact on the environment in both noise and vicinity to structures we are able to be respectful to the surrounding environment while keeping green.

THE COMPANY

Four Sides Media is a group of Google trusted photographers and industry leaders who have teamed up to create a business that is pioneering into the future.
